

Remove Duplicates from Sorted List

Given the head of a sorted linked list, *delete all duplicates such that each element appears only once*. Return the linked list **sorted** as well.

Example 1:

Input: head = [1,1,2]

Output: [1,2]

Example 2:

Input: head = [1,1,2,3,3]

Output: [1,2,3]

Constraints:

- The number of nodes in the list is in the range [0, 300].
- $-100 \leq \text{Node.val} \leq 100$
- The list is guaranteed to be **sorted** in ascending order.
