Approach

Check for each level if grouping is possible or not. Starting from level=1
Necessary numbers count will be getting added when level increases.

Level -1
^
Necessary - 1

Level - 2
^
^ ^
Necessary - 3

Level - 3
^
^ ^
^ ^ ^
Necessary - 6

And So On

Will be sorting usageLimits and starts from least cnt value, because ----

- The values from of minumum count must be utilised to reach to the maximum level

Complexity

- Time complexity: O(n)

- Space complexity: O(1) extra space
